Smith, George Wyatt : Lecture Notes on Tropical Medicine this is the quot;lecture notesquot; page of the quot;biol 382 pathophysiologyquot; guide alternate page for screenreader users skip to page navigation skip to page content this course is designed to provide an overview on

epidemiology and the internet for medical and health related students around the world based on the concept of
Lecture Notes on Tropical Medicine:

This is a core text of tropical medicine with an emphasis on the practical aspects of problem solving in the tropics It is a practical companion for the increasing number of medical students and junior doctors who have the opportunity to practice medicine in the tropics This edition includes more case histories and self assessment questions that put the subject into a clinical problem based context For many the limited laboratory backup and choice of effective treat This book lsquo tells you what the safe humane doctor actually does when confronted by an ill patient with only his or her clinical skills for guidance nothing in the laboratory pipeline and a very limited choice of available treatments rsquo Britis
