By John P Dalton : Fasciolosis liver fluke infestation fasciolosis has always been a problem during the late autumn and winter in the wetter western areas of the uk more recently liver fluke presentacin de casos centro de ciruga endoscopica hospital universitario general quot;calixto garcaquot; diagnostico de la fasciolosis de las vas biliares por Fasciolosis:

Fasciolosis caused by the liver flukes *Fasciola hepatica* and *Fasciola gigantica* is one of the most economically important helminth parasite diseases of livestock. In addition, it is recognized as an emerging disease of humans by the World Health Organization. Recent reports estimate that 2.4 million people are presently infected. This book is the first to be published for over 30 years which gives comprehensive coverage of these parasites and their control. About the Author: J. P. Dalton, School of Biotechnology, Dublin City University.
