From Holland Celia V Kennedy Malcolm W : The Geohelminths: Ascaris, Trichuris and Hookworm (World Class Parasites) The Geohelminths: Ascaris, Trichuris and Hookworm (World Class Parasites):

The soil transmitted nematode parasites or geohelminths are called because they have a direct life cycle which involves no intermediate hosts or vectors and are transmitted by faecal contamination of soil foodstuffs and water supplies They all inhabit the intestine in their adult stages but most species also have tissue migratoryjuvenile stages so the disease manifestations they cause can therefore be both local and systemic The geohelminths together present an
