From David S Newburg : Bioactive Components of Human Milk (Advances in Experimental Medicine and Biology) review article mechanisms of disease autophagy in human health and disease augustine mk choi md stefan w ryter phd and beth levine md biotechnology conferences 2018 industrial biotechnology events 2018 and biotechnology meetings 2018 will bring biotechnologists biochemists microbiologists Bioactive Components of Human Milk

(Advances in Experimental Medicine and Biology):

Although breast feeding has long been associated with lowered infant morbidity and mortality from infectious disease until relatively recently little was known regarding the individual components of human milk aside from their nutritive functions and the presence of secretory antibodies Over the last 40 years and especially over the last decade evidence has been growing that human milk contains a large number of materials that are bioactive and that are not found
