A practical training module on entomological field techniques for malaria control presented in two separately bound parts. The first addressed to learners provides step by step instructions in the field and work needed to secure comprehensive information about the mosquito population in a given area. Information is presented in a series of 13 illustrated learning units moving from the simplest collecting techniques that can be practiced in the laboratory to more sophisticated. About the Author: World Health Organization is a Specialized Agency of the United Nations charged to act as the world's directing and coordinating authority on questions of human health. It is responsible for providing leadership on global health matters.
