Agency Field Handbook:

The areas of the world whose populations are most affected by complex emergencies are often those with the greatest malaria burden. Consequently malaria is a significant cause of death and illness in complex emergency situations. This inter agency handbook focuses on effective malaria control responses to complex emergencies particularly during the acute phase when reliance on international humanitarian assistance is greatest. It provides policy makers planners field About the Author World Health Organization is a Specialized Agency of the United Nations charged to act as the world's directing and coordinating authority on questions of human health. It is responsible for providing leadership on global health matters shaping
