information is hidden in isolated pockets or stored in ways that make it difficult to use and impossible to share the health information and Regional Action Plan for Neglected Tropical Diseases in the Western Pacific Region (2012-2016):

Neglected tropical diseases NTDs are a public health issue in 28 countries and areas in the Western Pacific Region. Although some Member States have made remarkable progress in NTD control and elimination there is a vital need to consolidate these successes and further reduce the burden of diseases. NTD elimination and control efforts are recognized as one of the most cost effective interventions in global health today. This document serves as the Region's About the Author WHO Regional Office for the Western Pacific
